Plants from around the world that have naturalized along the Trail

**Ferns**

- *Japanese Climbing Fern* (*Pteridium japonicum*): This plant can climb almost anything, and is a common sight along the Trail. It is native to Japan.
- *Chinese Mistletoe Fern* (*Adiantum capillus-veneris*): This fern grows on many types of trees, and is native to Europe and Asia.

**Grasses**

- *Sweet Vernal Grass* (*Anthoxanthum odoratum*): This grass blooms early in the spring, and is native to Europe.
- *Chinese Privet* (*Ligustrum sinense*): This evergreen shrub is naturalizing in many areas of the United States.

**Trees & Shrubs**

- *Golden Bamboo* (*Bambusa multiplex*): This bamboo is native to China, and is fast-growing and invasive.

**Forbs & Herbs**

- *Golden Bamboo* (*Bambusa multiplex*): This bamboo is native to China, and is fast-growing and invasive.

**Invasive Plants**

- *Tree-of-Heaven* (*Ailanthus altissima*): This plant is native to China and is fast-growing and invasive.
- *ChinesePrivet* (*Ligustrum sinense*): This evergreen shrub is naturalizing in many areas of the United States.
- *Japanese Knotweed* (*Fallopia japonica*): This plant is native to Japan, and is invasive in many areas of the United States.

**Native Plants**

- *Wintercreeper* (*Euonymus fortunei*): This plant is native to Asia, and is a popular landscaping plant.
- *Sweet Vernal Grass* (*Anthoxanthum odoratum*): This grass blooms early in the spring, and is native to Europe.

**Other Plants**

- *Japanese Stiltgrass* (*Microstegium vimineum*): This grass is native to Japan, and is invasive in many areas of the United States.
- *Chinese Privet* (*Ligustrum sinense*): This evergreen shrub is naturalizing in many areas of the United States.

These are only some of the plants growing wild on the Trail; to learn more about them, join the Native Plant Society members on a field trip, walk, plant rescue or lecture. Visit www.ncps.org to see what’s going on!
