BIENNIAL LIFECYCLE & TREATMENT TIMING

mda.state.mn.us/weedcontrol

HAND PULL
Remove seedling and root.

DIG ROOT
Dig out root of small infestations.

MOW
Mow at least once per year during bud stage.

FOLIAR SPRAY
Spray after leaf out until bud stage.

GRAZING
Goats or sheep eat in spring and at bud stage.

PRESCRIBED FIRE
Burn seedlings and integrate with other methods.

Monitoring and repeated management is necessary for long term control of established infestations.
